SUMMARY

I am a dedicated Software Developer passionate about building robust, user-focused web solutions that drive business growth in today's digital landscape. Committed to leveraging modern technologies to help organizations strengthen their online presence and achieve measurable results. With strong problem-solving skills, consistent hard work, and a determination to deliver high-quality outcomes, I am eager to contribute effectively to innovative engineering teams and continue growing as a professional in software development.

Tech SKILLS

- Front End Development : using (React,JavaScript,HTML,TailWindCss,Typescript)
- Back End Development : using (FastAPI,Nodejs,Python,Flask,SQLite for database, Rest APIs)
- Tools : using (Git,Cloudinary,Linux)
- Currently learning Angular and Nextjs

Projects

My Portfolio - https://danielmuiruri.netlify.app/

- For a close-up look on my work, Take a look at my portfolio and see other projects I've tackled. Both on Frontend and Backend development. There are projects still on development as well.

EXPERIENCE

Technical Trainer – Software Development & Web Design at Morgan Technical Training | Kikuyu, Kenya

October 2024 – Present | Kikuyu Town

- Delivered hands-on training and mentorship in software development and web design to aspiring developers, covering frontend/backend technologies, best practices, and real-world project implementation.
- Guided students through debugging, and building portfolio projects, fostering problem-solving skills and technical confidence. - Enhanced communication and interpersonal abilities by explaining complex concepts clearly, providing constructive feedback, and collaborating with trainees and fellow instructors.
- Interacted directly with clients and stakeholders to understand training needs, tailor content, and ensure high satisfaction and measurable learning outcomes.

Junior Developer | Internship at italanta Company

Sept 2023 – Feb 2024 | Ngong Lane Plaza

- Solved some issues on an open source project we were working on (Goomza) and made several pull requests. The issues were mainly on frontend development (Angular).

- Worked closely with some of the top developers in the company to review their implementation setups and provided solutions specific to customer requirements.
- Worked on quarterly projects that involved major application enhancements and upgrades.
- Worked under very tight deadlines in developing the user interface (frontend development) of Elewa website using React + Typescript (tsx).

Key Accomplishments:

- Significantly gained Insight to a new programming language - (Angular): that i can add to my knowledge and grow more marketable

IT Consultant | Grizzly Systems LTD

November 2020 - November 2021 | Kikuyu Town

- Worked closely with the senior developer of the company in building websites for schools and other business institutions
- Gained communication skills - Since i had a big role in showcasing the work-flow of the website to the clients.
- Very partially served as a Junior engineer in frontend development. The technology used was JavaScript. Key

Accomplishments:

- Significantly learned how to work with others and understand the tasks at hand, delivered by clients: Which helped meet the customer's satisfaction and gave me a spectacular introduction to the software engineering world.

EDUCATION

Moringa School | Software Engineering (certification) Feb 2023 - August 2023

Intel College | Applied Business in Computing (degree) Jan 2020 - September 2022

NIBS College | Computer and Software Engineering (diploma) Jan 2018- November 2019
